Todd,

Ok, so the topics the Board is looking at addressing is depth, setbacks, boring and horizontal directional drilling vs conventional, shut off valves so many feet. I know listening to some meetings, they are proposing shut off valves so many feet but looks different in the country vs. closer to cities. We would obviously address any road haul agreements, signage, and safety training in the CUP process as we always do... Looking at more specific performance standards.

Let me know your thoughts...

Todd,

Looks like 8 inches will be the pipeline outside diameter from Aurora to Hartley segment. Maximum operation pressure of 2,200 pound per square inch gauge and with a normal operational range between 1,300 and 2,100 psig.

Todd and Luke,

So I did get the google interactive map today from the PUC . This really helps while we wait. I am going to be sending an email to the Navigator attorney, James requesting the shapefile. The PUC indicated that they will be requesting the shapefile after they do the first review of the application and thought as a govt entity, I should be able to obtain that information as well. Hopefully!

Just wanted to give you an update 😊

Todd,

We are ready to start writing policy regarding pipelines. Let me know when it works to sit down with you or have a phone call regarding this. I can scan and email you discussion points we have had at our round table talks if you would like too. I would like to have a review with the board on feb. 7th.. not sure if that is tangible or not.

Have a great Monday!

Work Group Meetings held December 12, 2022, December 20th, 2022 & January 17th, 2023:

Called the PUC regarding Aquifer concerns- Staff analyst stated the PUC does not have their own requirements or regulations surrounding environmental issues such as the aquifer. BUT they work with ERM (Environmental Resources Management). Staff hired the firm to review the application submitted, in this case Navigator. The company reviews any concerns from an environmental perspective and is considered by Staff Analyst when recommendation is brought to the PUC hearing. They will also work with DANR and other state agencies when reviewing application. If there are specific concerns surrounding the environment, comments need to be added to the docket. If represented by an attorney, the attorney needs to submit concerns to the docket. – currently the PUC has hired ERM to review the permit submitted by Summit, and they plan to do the same with Navigator.

Depth must be a minimum of 6' with at least a 2' buffer between any utility or tile lines.

Setback from any residence must be 1,320'. If existing residence is in the setback area, a residence waiver must be signed and recorded in the Moody County Register of Deeds. IF new construction is proposed within the setback area, a waiver of setback from existing pipeline must be recorded in the Moody County Register of Deeds.

Shut off valves must be required on each side of the Big Sioux River when HDD. – Based on the application submitted, the depth for HDD, if used, is 25' to 50'.

Shut off valves must be required at each residence site within 600' of the residence, on both ends- This will only include existing homes.... any new homes that choose to build a home within the setback area will need to sign a waiver.

Provide a reclamation plan when pipeline is decommissioned. - Do we want to require a bond?

We are looking at requiring EMT, Fire Fighters, and Emergency requirements on the CUP vs. making it apart of the ordinance.

PUC will determine if Public or Private use.

Landowners need to be aware and let Navigator know if any land is tied up in CRP or WRP land. – trees included.

All pipelines must bore under, state roads, county roads, township roads, and all driveways.

We need to determine the fee associated with the CUP application.

Subject: Pipeline Ordinance

Todd,

Here are some items I would like to have added to the zoning ordinance.

- Reclamation plan
- South Dakota One Call
- Transfer of ownership verbiage (Like our CAFO language)

Few thoughts:

We would like our setback to be 1.320 and measuring from the structure to the center of the pipeline, not from property line.

We would also like to add under number 6.A. Add any CAFO of 999 animal units and larger.

I think we are ok with removing the language under 6. ii. And number B.

Last thought, make this a use in the AG and CI?

Let me know if you have any questions.

Thanks.

Subject: RE: Pipeline Ordinance

Sorry for not getting back to you sooner – been on the road most of last 2 weeks –

I have taken your suggestions and put them into an ordinance format that is consistent with the County's approach to

1. setback/separation distances for CAFOS (how you measure them)..
2. Definitions of Dwellings
3. I did not place the use in the CI district as none of the "Cautionary Uses" in the Ag zone are allowed in the CI zone
4. Not sure what you want to do for "Reclamation Plan"? Do you mean Decommissioning? Does the county care if there are capped pipelines underground? If so how do you apply that to existing pipelines?
5. Not sure what your reference to SD One Call means?

My biggest concern how does this impact existing pipeline facilities currently in the County? Non-conforming? My suggestion would be to make these regulations not apply to pipeline facilities with a PUC permit that were in place prior to January 1, 2023. If that is possible – Need a legal opinion on that.

I will be out of the office in Sioux Falls tomorrow after 1 pm and all day Tuesday – Call me Monday morning if you have any questions

Hello Kendra, my prior response must not have gone through... let me know if you get this message...

As with what we've done across the footprint thus far, we are distributing process in terms of spending to date. In South Dakota, we've issued over \$1.7 million to landowners in South Dakota, with about \$320K of that within Moody County. We continue to make good progress across the entire footprint.

I am working on purring additional information together and will get you another update soon. Has the County locked in the dates for the public hearings yet? If so, please let me know the dates and times. Jason

Subject: RE: Navigator Pipeline
Attachments: trent pipeline.JPG

Kim,
We have been working on getting the pipeline map on our website, until that is up and running I have attached an image of the pipeline location near Trent. The yellow line in the middle of the red is the actual pipeline. The red is a 600' buffer on each side of the pipeline. (hope that makes sense) If it does not make sense, please give me a call and I can chat a little more with you. What I have, is the pipeline is going to be located about 1.5 miles east of town.

We currently have a moratorium on all pipelines, going on year 2, and working towards a pipeline ordinance. As far as anyone stopping anything, I have no clue. The application is still at the PUC and should have a decision on this application sometime this fall. Once that decision is made, and we have our ordinance in place, I am anticipating and application from Navigator's for a conditional use permit for Moody County.

Let me know if you have any questions.

Kim,

I am reaching out to all cities with in Moody County for an opportunity to share concerns and thoughts surrounding the proposed CO2 pipeline. We will have a round table discussion with our work group after the commission meeting on January 3rd, 2023. If you, or any city representatives are interested in this discussion, please let me know and I will get you a more detailed time as the agenda comes together for that meeting. I measured approximately 1.5 miles from city limits to the pipeline.

Please reach out with any questions.

Dave,

I appreciate your willingness in wanting to be involved with the work group. Unfortunately, this work group is only open to county officials and employees. You both will have the opportunity to be involved in the pipeline discussions once we publish a time and place for the public hearings.

Subject: CO2 pipeline

Kendra, can I be added to the work group you're forming for the CO2 pipeline? I am interested in learning about it and giving my and Gwen's thoughts.

Thank you,

Dave Reker

The joint meeting of the Moody County Commissioners/Planning Board met on Tuesday, May 23rd, 2023, at 6:15 PM held at the William Janklow Community Center. Members present: Jerry Doyle, Randy Hemmer, Dave Reker, Carla Bruning, and Dan Miles. Also Present: Commission Assistant Marty Skroch, Moody County States Attorney Paul Lewis, Moody County Sherriff Troy Wellman, and 55 interested residents.

Motion by Hemmer and seconded by Reker to open discussion recommending possible approval of Ordinance # 2023-01. All voted aye. Motion carried.

Paul discussed Moody County's jurisdiction.

Carla discussed the background of Ordinance 2023-01.

Kendra Eng , Zoning Administrator, gave some recommendations for additions to the proposed Ordinance #2023-01.

Carla opened the public hearing.

Rick Veldkamp, Joe Munson, Mark Ekern, Gwen Reker, Linda Goetz, Monica Howard, Brian Brinkman, Cindy Menning, Aaron Johnson, Clayton Rentschler, Brian Teal, Chase Jensen, Dan Janssen, Linda Goetz, Ted Lacey, and Randy Gross were all allowed 3 minutes to give public testimony.

Carla closed the public hearing.

The Joint Board of County Commissioners and Planning Commission discussed testimony that was given.

Motion by Reker and seconded by Miles to meet on June 12th, 2023 at 9:00 am at the Moody County Courthouse in the Commissioners Room to have further discussion, and may pass a resolution recommending approval of Ordinance #2023-01, with or without amendment, to the Board of County Commissioners. The Commissioners may have a first reading of Ordinance #2023-01 by title and set a 2nd reading date. All voted aye. Motion carried.

Motion by Miles and seconded by Doyle to adjourn. All voted aye. Motion carried.
